Oval Gear Flow Meters Series OG1 – OG7 / OG1

Chemically resistant and for high viscosity

These compact rugged oval gear flowmeters by Titan Enterprises are designed to give high performance with a low cost of ownership. These meters are happy measuring simple water like products as well as lubricating fluids. There are several versions; some can have totally non-metallic wetted components, PEEK™, ceramic and a choice of elastomer, which makes these the ideal choice for the metering of aggressive chemicals. The standard inlet and outlet are BSP or NPT female threads, flanges are also available. For OEM use alternatives, including manifold mountings, are available. The standard models are 316 St St, aluminum, and PEEK. *) For hazardous areas the reed switch (simple apparatus) or Namur sensor may be used.

At the heart of the meter is a pair of toothed oval gears one of which contains chemically resistant magnets, the gears rotate freely on robust bearings. Rotation is detected through the chamber wall by a Hall Effect detector or a reed switch giving an accurate number of pulses per liter passed. The output is an NPN pulse or a voltage free contact closure either of which is readily interfaced with most electronic display or recording devices. This combination of materials and technology ensures a long life product with reliable, accurate operation throughout. PEEK is a superb material for gear and bearing manufacture, it has excellent pressure and velocity characteristics coupled with very good thermal properties and chemical resistance. For fluids with viscosities above 1000 cSt. especially cut gears are required and the flow range is reduced for a given meter size.

*) OG6 and OG7 not available in PEEK

Features

- Excellent chemical resistance
- Rugged construction
- Individual calibration
- High viscosity capability
- Low pressure loss
- Flow conditioning not required
- Compact meter assembly
- Hall Effect, Reed Switch or Namur sensor
- Good accuracy and repeatability
- IP67 / NEMA 4 protection
- Models up to 700 Bar
- Non-metallic version

General Technical Specifications

- Accuracy: see Table 1
- Repeatability: $\pm 0.1\%$
- Pulse output: Hall Effect (NPN), Reed Switch or Namur sensor
- Pressure ratings: 10 bar (145 psi), 50 bar (725 psi), 400 bar (5800 psi) or 700 bar (10150 psi)
- Temperature ratings: 80 °C (176 °F), 100 °C (212 °F) or 150 °C (302 °F)
- Body: Peek or 316 stainless steel
- Gears / Magnets: carbon filled Peek / Ceramic
- Spindles: stainless steel
- Seals: Viton, Nitrile, EPDM or Kalrez
- Connections: NPT or BSP female standard; flanges on request
- Supply voltage: 4.5 – 24 Vdc (Hall Effect)
- Reed Switch: 24 V / 100 mA max.
- Protection class: IP67 / Nema 4X
- Calibration: for water over 6-points with certificate
- Strainer / filter: recommended for particulates > 80 micron
